

Weekly Report  
Yicheng Sun  
01356301

In this week, first, I found that Django does not support MongoDB, so I changed my mind, I decide to use sql as my database. After that, I did some research on Django and SQL. then I setup all the softwares on my computer and setup all the environments. Third,I build my data base with my labeled pictures.

In the next week,I will build my website, and try to connected it with my database.
